### ABOUT MYSELF

Hello, I'm Yok. I am very interested in the work of a developer because this line of work is an important part of the development of technologies. Including helping to develop and solve various problems to make the quality of life and our world more progressive. I am actively seeking opportunities to make an impact in the evolving world of technology. I'm ready to learn new things and develop their skills to become even better in every aspect.

### Career Objective

I want to apply for a job as a developer. I want to be a part of finding solutions to solve problems and developing products. To be efficient and bring maximum benefit to the company and our society. Including improvement of my technical, business, and soft skills.

### Personal Projects
